DATA ACCURACY FILTER FOR INTEGRATED EMERGENCY MEDICAL TRANSPORTATION DATABASE SYSTEM

Abstract of the Disclosure

5   An integrated medical database system for the emergency medical transportation business. The system includes a dispatch module, clinical module, administration module and billing module. Each module may communicate data with one or more of the other modules to form a system incorporating data sharing, thus achieving an end-to-end automation of emergency medical care accounting. Internal consistency checks

10   using specific libraries of modifiable data rules are performed by the system to ensure that proper treatments are performed according to a chosen diagnosis. The system includes a demographic data accuracy filter operating on patient data prior to the billing module.
